

TOOLBOX SAFETY TALK

LIST SOME HAZARDS THAT MAY CAUSE SLIPS, TRIPS, OR FALLS

EXPLAIN THE DANGER

Most injuries resulting from falls aren't caused by falls from overhead, as you might think. They are from falls at ground or floor level where we walk and work.

- Clutter accumulates quickly on site—scrap lumber, broken bricks, pieces of drywall, strap-bands, and packaging.
- How can you concentrate on your work when you're worried about slipping, falling, or tripping over garbage and debris?
- Clutter can often be irregular in shape, hard to handle, and full of sharp objects.
- **One of the biggest problems is packaging.** Too often packaging gets removed from material and left wherever it falls. This creates tripping and slipping hazards. It also makes other hazards hard to see.
- **Mess invites more mess.** When a site isn't cleaned up, no one cares about leaving garbage where it drops. When that happens, you can't see faulty wiring, protruding nails, damaged flooring, and missing scaffold planks.

IDENTIFY CONTROLS

Housekeeping means cleaning up scrap and debris, putting it in containers, and making sure the containers are emptied regularly. It also means proper storage of materials and equipment.

Effective housekeeping and storage prevents accidents and injuries.

- Clean up as work proceeds.
- Keep equipment and the areas around equipment free of scrap and debris.
- Keep stairways, ramps, and other travel areas clear.
- Secure loose or light material stored on roofs and open floors to keep it from blowing away in the wind.
- Never let material fall from any level of the project. Use an enclosed chute or lower the material in containers.
- Store material so that it won't roll or slide in the direction of the opening. Use blocking if necessary.
- Before handling used lumber, remove or bend over any protruding nails and chip away hardened concrete.
- Remove flammable clutter and debris immediately from sources of ignition such as welding, flame cutting, and propane heating.

DEMONSTRATE

Review housekeeping problems unique to your location.
